

intertherm®

The right choice. Right from the start.

Invest in high-efficiency now and save for years to come.

Investing in a 95% AFUE manufactured housing furnace today can offer big savings over the lifetime of your HVAC system. A 95% AFUE furnace offers

16% savings over an 80% furnace.

These savings can help pay for itself with a payback period of 16-24 months. Over that time, you can enjoy

\$405 annual savings.*

When you figure in the average lifespan of a furnace, your potential savings are almost

\$4,500 over a period of 15 years.

**(Assumptions: Average furnace run time/year = 1350 hours at an average winter timeframe of 4-6 months)*

Intertherm 95% AFUE MG2R Gas Furnace

Innovative in-shot burner design, inducer location and insulation provide clean, quiet, and efficient operation.

A **top-of-the-line energy-efficient motor** improves comfort while helping reduce operation costs.

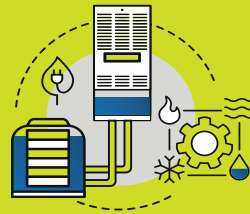

Fully factory tested for product **quality assurance**.

Five-year limited parts warranty when registered and matched with an Intertherm split system.
